

NGO online

by precio fishbone 

A program, project and grant
management system designed
specifically for NGOs.

Supporting everything from grant management through to project operations in the field, NGO Online is designed to support the needs and processes of the NGO sector.

What is NGO Online?

NGO Online is a cloud-based program, project and grant management solution specifically designed for international development and humanitarian NGOs.

Accessible from anywhere with an internet connection thanks to its lightweight and cloud-based design, NGO Online offers a suite of functionality to support project and grant management, improve oversight and visibility, capture data, organisational knowledge, decision making and more.

NGO Online is highly configurable to your organisation's needs and ways of working and can be aligned with International Aid Transparency Index (IATI) standards. The system can also be integrated with ERP and HR systems already in place for greater visibility of your organisation's portfolio and financial data.

Background

Originally developed as a bespoke project and information management solution for the British Red Cross in 2011, NGO Online has been developed, optimised, and tested through years of implementations with international NGOs around the world, including numerous national Red Cross societies, members of the Oxfam confederation and more.

Looking for flexibility? NGO Online is highly configurable to your organisation's needs and ways of working. And thanks to built-in Administrator functionality, you can easily manage and update your workflow cycles, templates, metadata, configuration and more as your organisation changes and evolves over time.

Features

- ✓ Program and project management
- ✓ Grant and funding pipeline management
- ✓ Partner and donor management

- ✓ Highly configurable to your needs and ways of working

Benefits of Microsoft 365

- ✓ Get access from virtually anywhere on most electronic devices
- ✓ Work on Microsoft Office suite documents online or offline
- ✓ Access e-mail, calendar, and contacts anywhere and anytime
- ✓ Automatic backup of files
- ✓ Share files and collaborate with colleagues in real time
- ✓ Version control
- ✓ Powerful document search capabilities to let you find documents with ease

Well known technology

NGO Online is built on SharePoint Online, part of the Microsoft 365 platform. Building on SharePoint's rich set of functionalities for information sharing, document management, task management, collaboration and workflows, NGO Online offers specialised and fully customisable functionality designed for NGOs.

NGO Online also uses WCF-services and a dedicated Azure resource to improve system performance and increase flexibility.

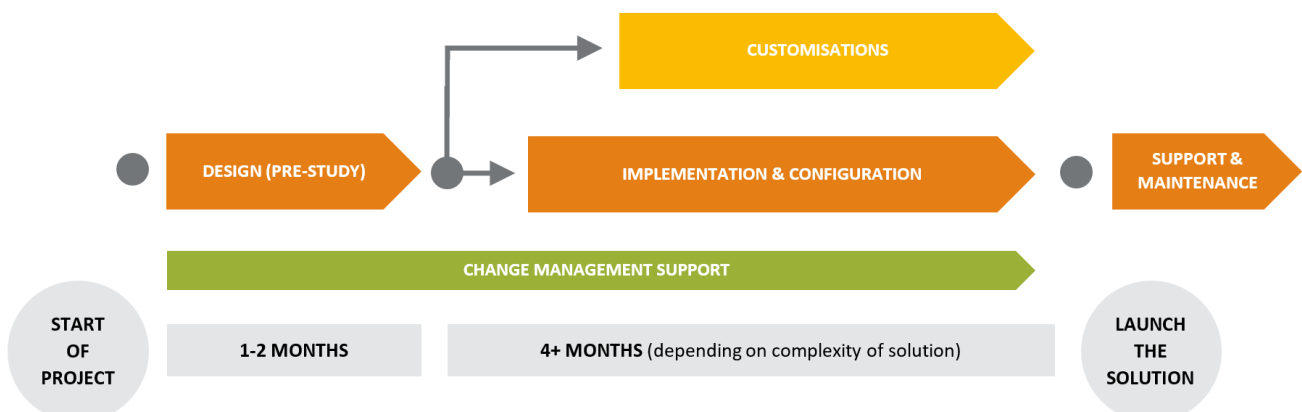

The SharePoint Online platform and NGO Online are configured to meet each NGO's individual needs and are adapted accordingly to each individual organisation's visual identity.

About Microsoft 365

Microsoft 365 is where Office meets the Cloud. The power of the cloud enables users to access up-to-date information and documents from anywhere in the world, even in areas of low bandwidth. With the capability of working on documents offline thanks to OneDrive for Business's offline technology, NGO Online users can always access their documents.

Effective Implementation

NGO Online is more than just a great system. With a dedicated team of IT and former NGO-sector practitioners, we support you every step of the way through the design, implementation and change management process.
